

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site Name:	Ameri-Kart
Applicant's Name:	Enicon Division of Ameri-Kart Corp.
Site Location:	17196 St. Road 120 East Bristol Elkhart County
VRP Site Number:	6950301
Project Manager:	Carla Gill
Date Application Received:	March, 1995
Date Project Completed:	June, 1995
Project Duration:	3 months
Contaminant Group(s):	Volatile Organic Compounds (VOCs)
Media Cleaned Up:	Surface Soil, Subsurface Soil, Groundwater
Cleanup Goals Achieved:	Tier II Nonresidential
Deed/Land Use Restrictions:	None

Project Description: The facility produces various polyethylene tanks for the RV industry. The site investigation revealed that trichloroethane and *cis*-1,2-dichloroethene had leaked from 55-gallon hazardous waste drums and contaminated the soil and groundwater immediately beneath the drums.

Because contamination detected did not exceed the Voluntary Remediation Program's Tier II Nonresidential cleanup criteria, no active remediation was performed.

By participating in the Voluntary Remediation Program, Ameri-Kart was able to complete the sale of their facility to Myers Industries.
